

Historical Maps Function

The maps date from 1963 to 1985 and 1985 to 2000.

- A Historical Maps drop down list is available on the Map tab.
- When the system loads it will say "No Maps Available".
- To view an historical map, you must zoom to less than 1:15,000.

As you zoom in to the required location closer than 1:15000, the options in the drop down list changes to list any maps that are at that location.

Only one map can be displayed at a time, the files are large and take a few seconds to load.

Once you select a map, you get the option of clearing that selection and also to display the previously selected image in the drop down.
